

Economic Development

Facilitate the development and future growth of existing and new communities that will greatly benefit from the connectivity that the DART+ Coastal South project will deliver.

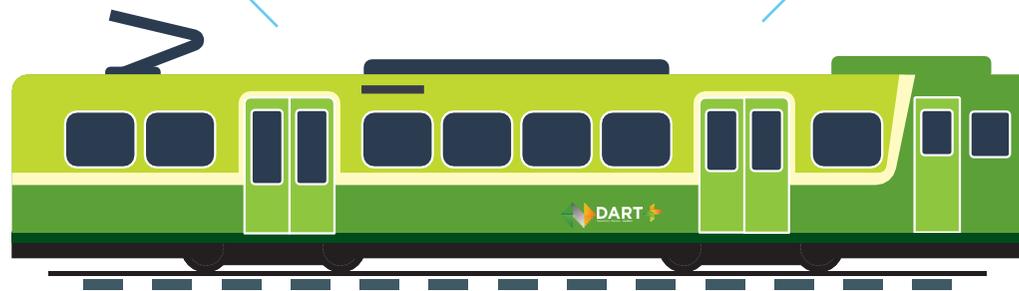

Building a Sustainable City

Build a sustainable and connected city region, supporting the transition to a low carbon and climate resilient society.

Journey Time Reliability

The project will provide improved journey time reliability and reduced waiting times.

Tackling Road Congestion

Improved DART services will play a part in alleviating road congestion in the GDA.

Future-proofing our Public Transport Network

DART can act as the core spine of an integrated and sustainable public transport network, providing long term infrastructure to future generations.

Increasing Capacity & Frequency

Increased peak passenger capacity and increased train frequency between Dublin City Centre and Greystones facilitating frequent and reliable transport to the surrounding communities.
